

Name:

Group: CPMAD L1

Key Domain: Food & Beverage (Food Delivery App)

A. Project Title

Food Express

B. Background

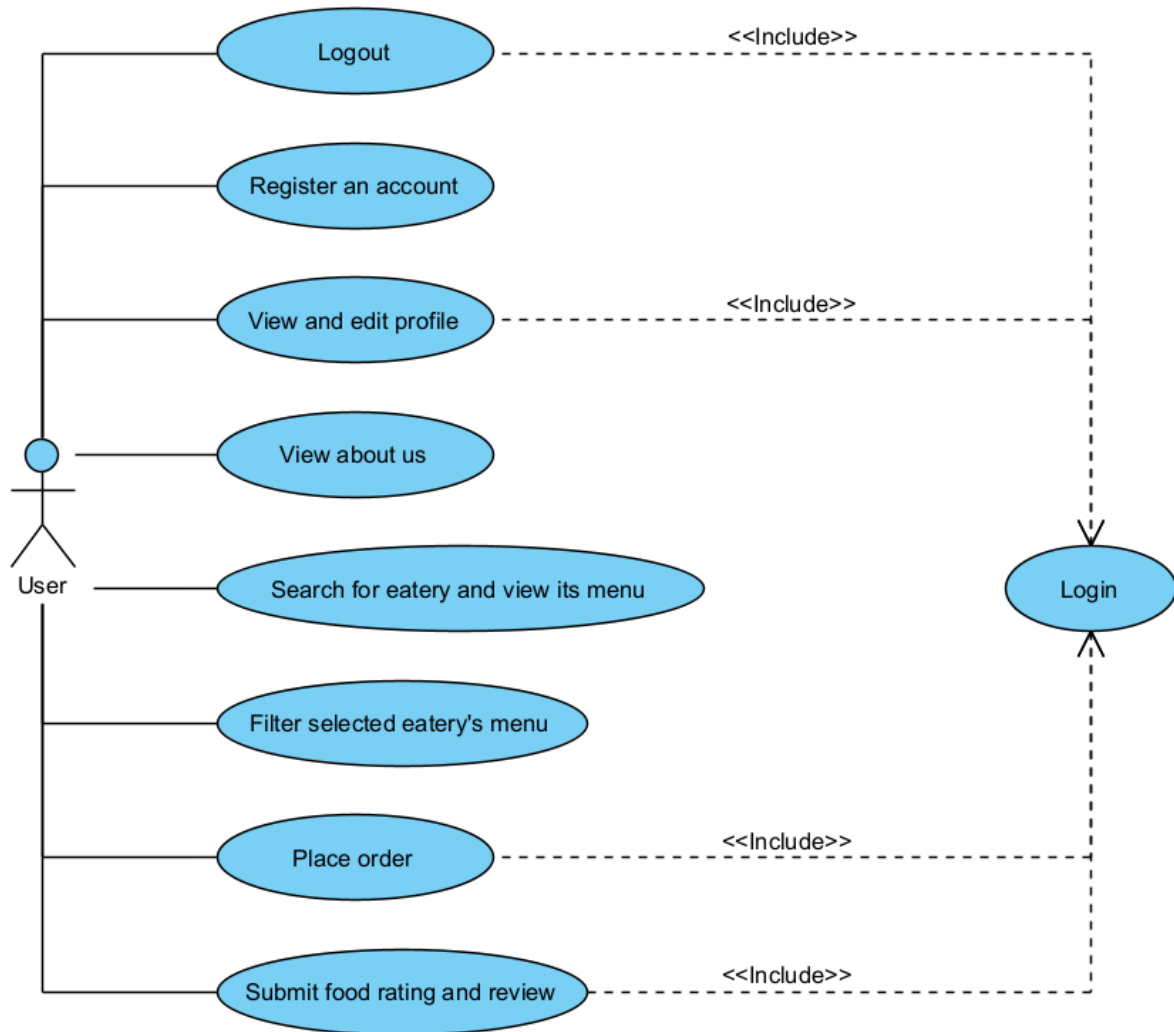

There are many eateries around Singapore that sell a wide variety of delicious food and beverages. However, not all locations of the eateries are easily accessible or convenient. With the use of mobile application, it provided food delivery services to users.

C. Objectives

The main objective is to enable the users to search for eateries and placed order online. There will be a list of eateries and menu to entice them to try out the delightful food and beverages there. They can input special request or customization to their order. After completion of ordering, food would be delivered. At the same time, they could also explore other eateries around Singapore.

D. Key Functional Features
